

OTP site testing 15 06 26

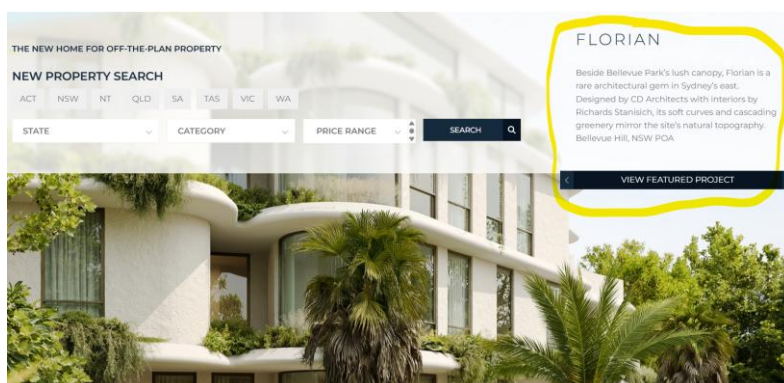

// New site going live; user/client logins for first time, best easiest UX = instead of us issuing the new passwords, let's just have them set their own the first time they login. I think cleaner and easier. Would this work okay?

// Home page:

Hero video / image – CTA missing to link through to the development, current site vs vercel site tomorrow, note the new CTA does not need to be as elaborate as the current site. There should be some notes somewhere on this. From memory we just need some overlay text: FEATURE PROJECT: {project name}{suburb}{state} << hyperlinked to the actual listing. this should be programmable in the master admin area.

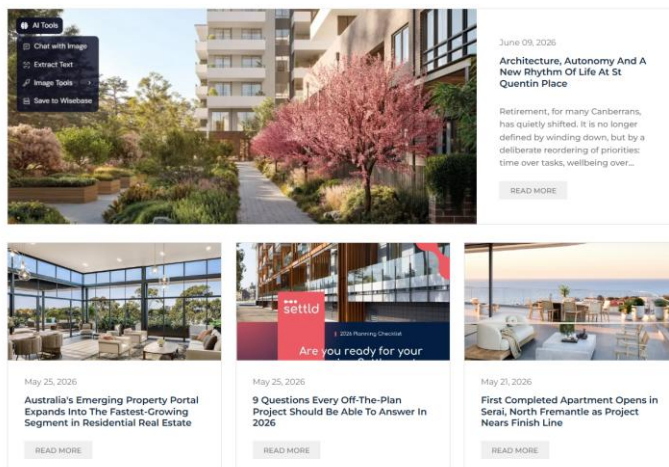

Current site =

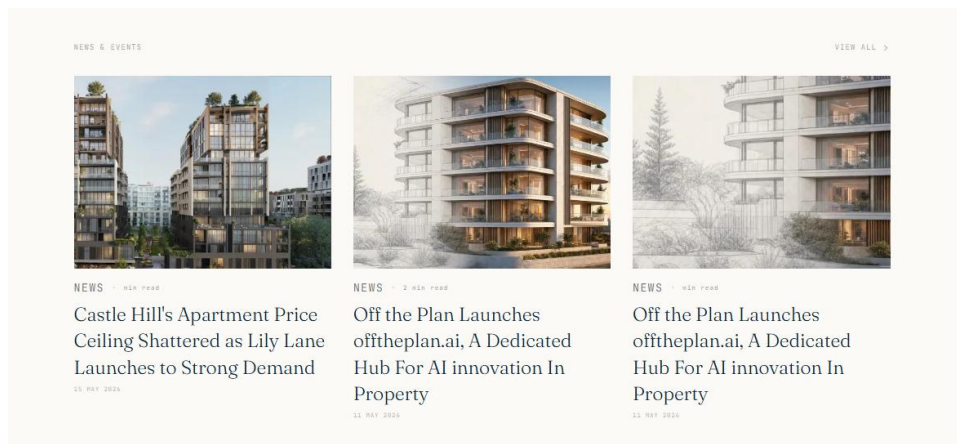

Maybe here?

News featured articles on home page layout needs amending to match current;

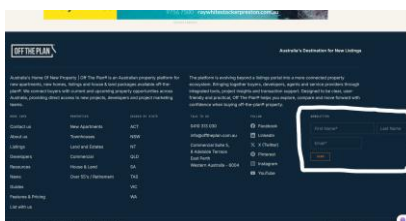

Vercel:

And this link needs to go to “news” page for now. Currently broken:

Footer buffer still not fixed:

Current live site:

NEWSLETTER

First Name* Last Name*

Email*

SEND

** Do we need to update footer area font? Seems to not align with rest of site like it's a bit of an older font for our new style. ?

// General through-out site; UX fix for image galleries the ability to swipe left and right on touch screens. And double finger mouse for example ie as well as just clicking the arrows.

// News page:

Current = <https://offtheplan.com.au/news>

Vercel site: <https://off-the-plan-6q3k.vercel.app/news>

No skyscraper (side banner)

ALSO the actual article pages are not optimised per current site, this needs to be matched/mapped and fed from the master admin same as current site;

Hero Image and article heading, “share section” missing down the side, images 2 and 3 not working as is currently, previous & next missing.

You can tweak design somewhat, ensuring mobile friendly and search friendly, but just so long as essential elements are all there as they are currently missing.

Compare:

Current = <https://offtheplan.com.au/news/castle-hill-s-apartment-price-ceiling-shattered-as-lily-lane-launches-to-strong-demand>

Vercel: <https://off-the-plan-6q3k.vercel.app/journal/castle-hills-apartment-price-ceiling-shattered-as-lily-lane-launches-to-strong-demand>

// Guides Page:

Current = <https://offtheplan.com.au/guides>

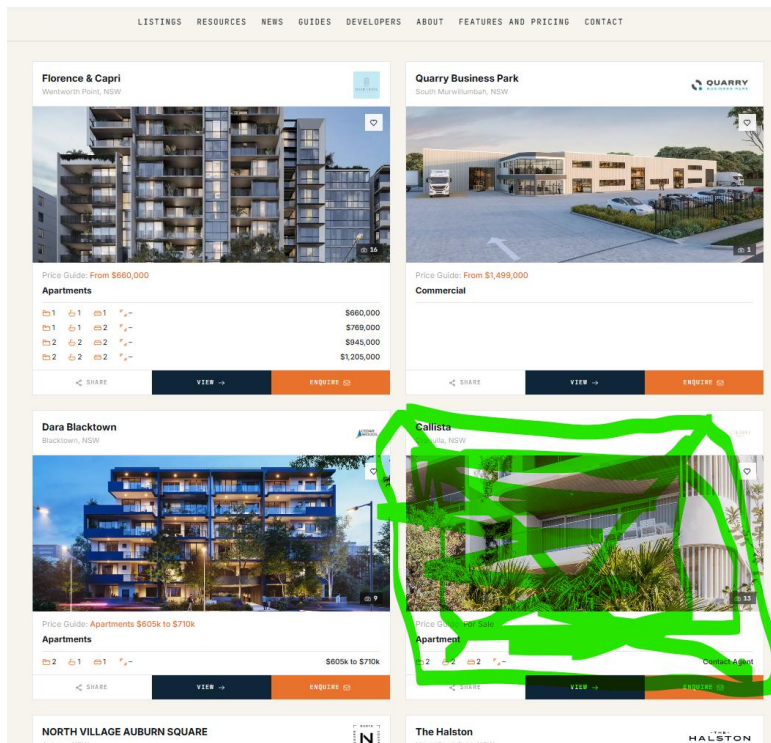

Vercel site: <https://off-the-plan-6q3k.vercel.app/guides>

Layout is different, no banner as well.

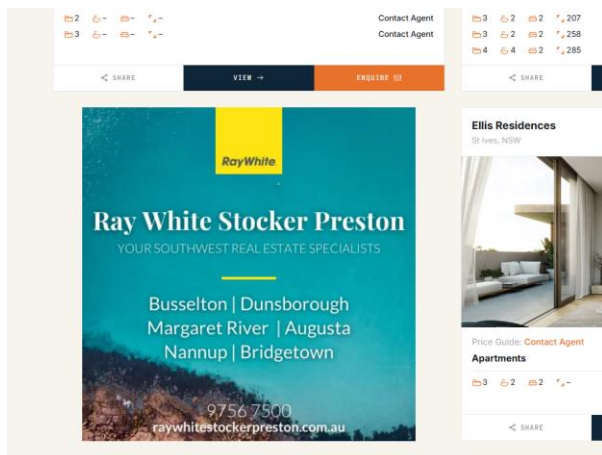

Similar to above (news note) Ensure actual individual guides pages are the same or similar to current site.

// Search/Listings page:

This banner needs to be pos. 4

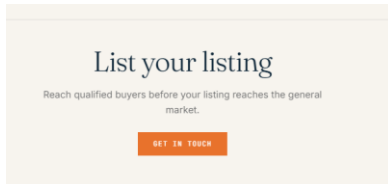

Currently pos.9

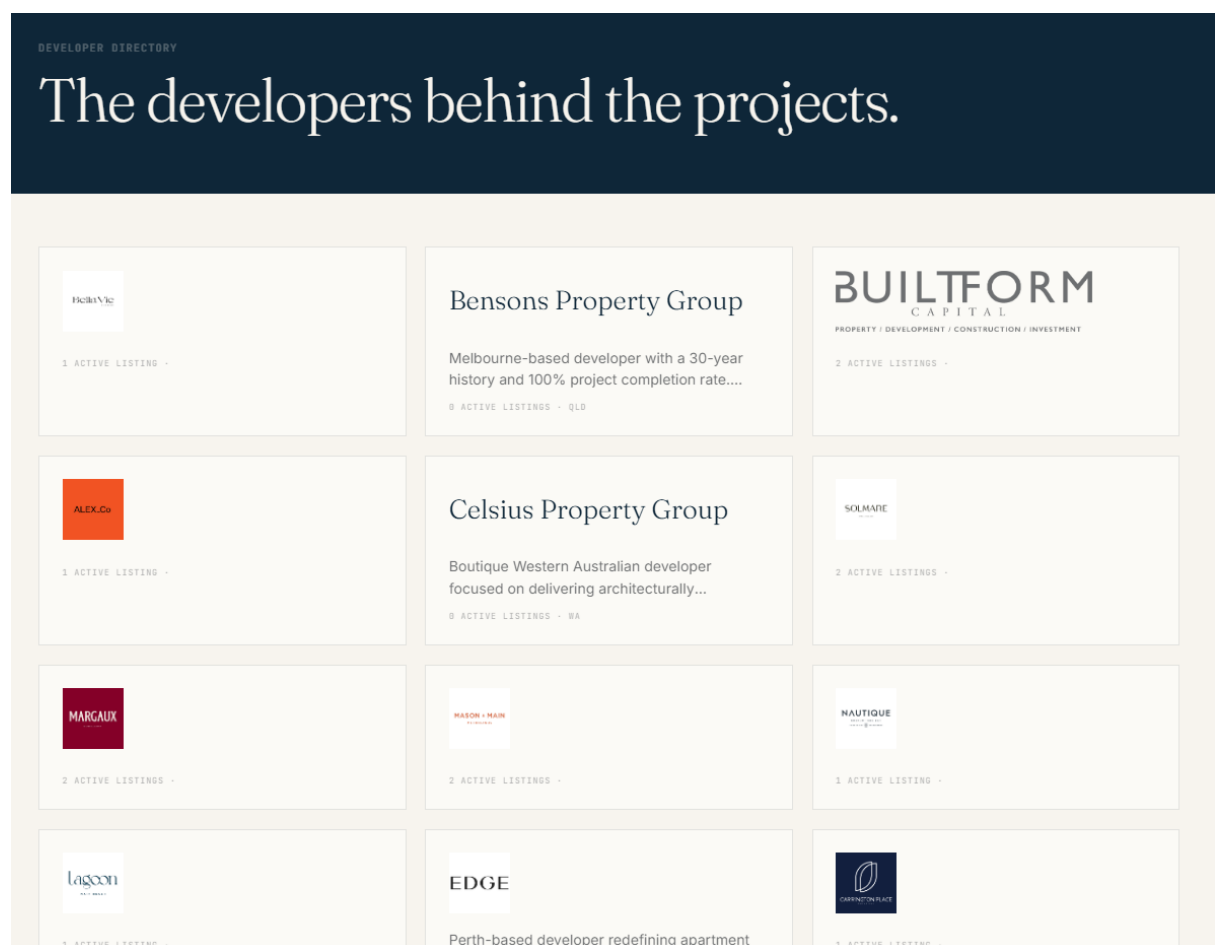

// Project page, gallery we were changing format to: TBC. Regardless needs scroll UX to allow for finger left and right on laptop mouse pads, touchscreens.

// /developers page;

1. where do I edit who is on here? I need to remove a few perhaps we can add a tick box / select box to the client profile page to opt in to displaying on this directory ? ALSO this link needs to say LIST NOW

- the page is showing developers and developments themselves eg Serai is a development, Megara is the developer: For now lets just show Developers only that are registered as Developer profiles in the back end. We will properly scope and build this feature out in the next phase.

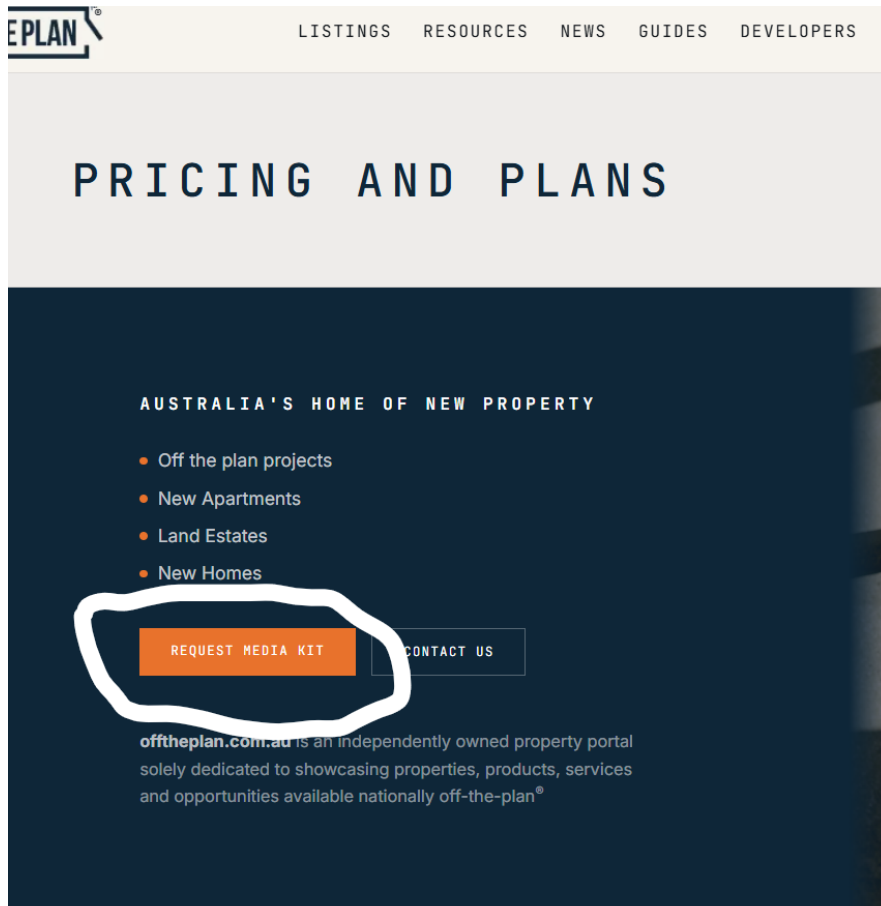

- please make sure the developer(s) landing page looks good and allows for their Company Name, Logo**, Suburb, State, links to socials if applicable from back end, Bio, contact form (that goes through to their registered email address in their profile(cc me/sales@) and displays their current listings. e.g <https://off-the-plan-website.vercel.app/developers/built-form-capital>

**notes for logo's from clients, real estate clients have all shapes and sizes makes it a little difficult most will have say a rectangular version and a square version we need to

make sure in the profile area for the developer / agency there are clear guidelines for what we need to make sure these look good on the site, throughout the site. Or if we can and have an auto resizer that's great too.

// Pricing and Features; change label to just PRICING also this button does not work like the current live version

START LISTING WITH OFF THE PLAN

// About us; All images need updating to current site ones, or use render/ images from our current listings.

Reduce this space:

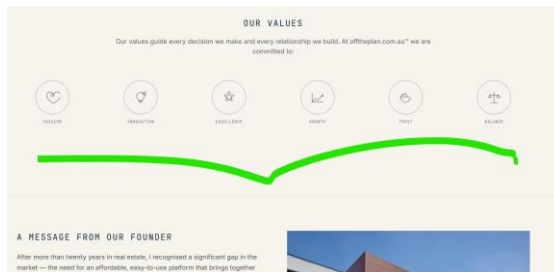

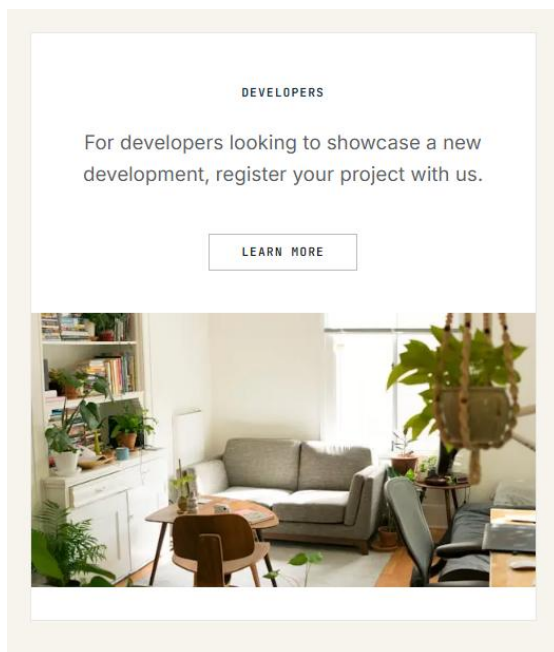

Image in this tile needs proper aligning and change CTA to LIST TODAY

// Resources page; <https://off-the-plan-website.vercel.app/resources/calculators>

Side banner is missing refer current live site.

Change CTA's (all) from learn more to: OPEN HERE

Can we centre align the calculators more? <https://off-the-plan-website.vercel.app/resources/calculators/stamp-duty>

// BANNERS; please check as I have raised this a few times; the vercel banners do not look standard sizing compared to current live site, please confirm; they appear on the home page, the listing/search page, news, guides, full list of placements and the specifications appear in the master login under ads management as this feature needs to work and be up to date:

Ads Management
